

Our Elliptical Roof Pram Shelters provide a safe, clean and dry place for the storage of prams and pushchairs, frequently specified for Childrens Centres, nurseries, health centres etc. Our outdoor Pram Shelters allow valuable indoor space to be put to better use and avoid the hazards of blocked entrances. Manufactured from high grade aluminium BS EN 7554 (1-9), our Elliptical Roof Pram Shelter can be supplied with locking door, solar lighting and guttering system. Powder Coated BS EN 12206 to any colour (s) of your choice and glazed with either toughened safety glass, poly carbonate or anti-vandal materials, the shelter can also be supplied with colourful signage to match your setting. Various permutations are available to suit your individual requirements. Installation by our own engineers takes normally just a single day.

Pram Capacity	Dimensions (mm)		
	Internal Height	Length	Depth
5-8	2150	2500	2500
9-14	2150	3000	2500
15-20	2150	4000	2500
21-26	2150	5000	2500
27-32	2150	6000	2500
