

The Winchester Canopy provides a safe and dry environment for outdoor play. Frequently specified for Childrens Centres and nurseries Winchester Canopy incorporates UV stable poly carbonate roof glazing protecting against harmful rays from the sun enabling children to play outside safely in all weathers. The Winchester Canopy is manufactured from high grade aluminium BS EN 755 (f-g) and powder coated BS EN 12206 to any colour(s) of your choice giving a long lasting corrosion free and low maintenance finish. The integral guttering and concealed down pipes give excellent anti vandal and safe drainage solutions. The strong construction means that a wall mounted unit can project out from any building by 6m with only front uprights making the Winchester one of the safest canopy systems on the market for nurseries and schools
